DETAILED ACTION

1. This application is in condition for allowance except for the following formal matters:

Specification

2. The disclosure is objected to because of the following informalities:

On page 3, line 7, "like" should be deleted.

On page 3, line 25, "peoples" should be "people's".

On page 7, line 9, "an" should be "a".

On page 9, line 26, "networks" should be "network's".

On page 12, lines 11, either "recognition" should be capitalized for consistency, or "Speech Recognition" should be changed to non-capitalized letters throughout the Specification.

On page 12, lines 18 to 19, "it's" should be "its" (two occurrences).

On page 13, line 14 to page 14, line 29, the underlining reflecting changes should be deleted.

On page 14, line 25, the italics should be removed for "by using name".

On page 16, line 11, the question mark should be removed.

On page 17, line 28, "he" should be "the".

On page 18, line 16, "server/application 1 informs" should be "server/application 1 informs".

Appropriate correction is required.

3. The disclosure is objected to because it contains an embedded hyperlink and/or other form of browser-executable code. Applicant is required to delete the embedded hyperlink and/or other form of browser-executable code. See MPEP § 608.01.

On page 9, line 10, the embedded hyperlink needs to be deleted.

Information Disclosure Statement

4. The Information Disclosure Statement filed 23 February 2005 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

The Foreign Patent Documents AB, AC, AD, and the Other Prior Art AE are not found. These references are not readily available to the USPTO, and cannot be considered unless they are supplied by Applicant.

Priority

5. Applicant is advised of possible benefits under 35 U.S.C. 119(a)-(d), wherein an application for patent filed in the United States may be entitled to the benefit of the filing date of a prior application filed in a foreign country.

Applicant is requested to clarify whether priority is being sought under 35 U.S.C. §119(a) – (d) or only under 35 U.S.C. §120. Applicant's Declaration indicates that priority is being sought for PCT/EP02/09822, which is listed as a "Prior Foreign

Application", but Applicant has not checked the box indicating that priority is being sought under 35 U.S.C. §119(a) – (d). The USPTO has indicated that priority is being considered for PCT/EP02/09822 under 35 U.S.C. §371 and 35 U.S.C. §120, so that no foreign priority conditions are claimed or met. If Applicant believes this is an error, Applicant should submit a new Declaration clearly indicating that priority is being sought under 35 U.S.C. §119(a) – (d). Conventionally, though, it appears appropriate that a national stage application filed under 35 U.S.C. §371 is accorded priority under 35 U.S.C. §120, but not 35 U.S.C. §119(a) – (d).

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

ALLOWABLE SUBJECT MATTER

6. Claims 19 to 34 are allowed.
7. The following is a statement of reasons for the indication of allowable subject matter:

Independent claims 19, 23, and 31 to 34 are allowable because the prior art of record does not disclose or reasonably suggest recognizing spoken instructions associated with a VPN number for a stored VPN address, so that the VPN address is translated from the spoken instructions. *Griswold et al.* is the closest prior art of record,

disclosing the basic concept of translating spoken words into a web address, and mentions an application to a virtual private network. See ¶[0046] – ¶[0047] and ¶[0078] - ¶[0085]. However, *Griswold et al.* does not disclose VPN addresses or VPN numbers, or a switch, although a switch is well known in cellular telephone architectures. *Curry et al.* discloses an intelligent network with switches 110 that extracts an address or number from a query for translation or look-up. (Column 18, Lines 54 to 63) Still, *Curry et al.* doesn't disclose VPN numbers or VPN addresses from recognized spoken instructions. Similarly, *Lim et al.* discloses a voice-recognition-based method for calling a party at one of a number of locations, but is not directed to VPN numbers or VPN addresses. Applicant's Specification, Page 16, Line 28 to Page 17, Line 11, states that the invention is applicable to a VPN, where a user is trying to reach a person in the same company. The prior art of record does not disclose or reasonably suggest receiving a speech instruction associated with a VPN number, recognizing an additional spoken input indicating that a VPN address is stored, translating the speech instruction into a VPN address, and transferring the VPN address to a switch.
